

As of this date, October 2, 2011, the Town of Alton adopts the lightweight construction identification program. As part of the package given to building permit applicants, they will be required to have one of four stickers placed on the electrical meter or disconnect identifying the construction type. No permit shall be closed out before this ordinance is satisfied.

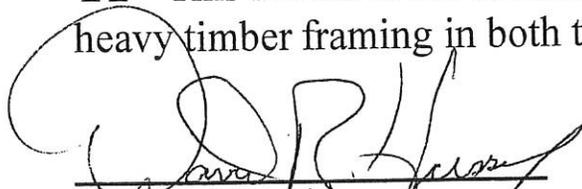

GUIDELINES FOR LIGHT WEIGHT CONSTRUCTION STICKERS

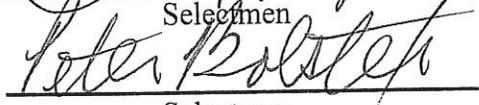

F This sticker is for structures with truss, I joist, or any construction method other than dimensional lumber or heavy timber framing in the floor

R This sticker is for structures with truss, I joist or any construction method other than dimensional lumber or heavy timber framing in the roof

FR This sticker is for structures with truss, I joist or any construction method other than dimensional lumber or heavy timber framing in the floor and roof

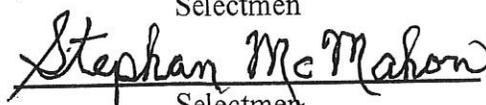

TF This sticker is for structures with dimensional lumber or heavy timber framing in both the floor and roof
